

Regulation 4 Update

How the change to regulation could impact your business or event.

Beginning May 13, 2023, an addition was added to Regulation 4 allowing for Special Event Permits to be issued at already licensed establishments. Below is a quick guide to the change.

01

MANUFACTURERS

May be granted a permit for an event to occur on a licensed premise.
The manufacturer must have permission from the licensee.

02

WHAT PRODUCT

Only product lawfully produced by the manufacturer can be brought onto the licensed property.

03

THE ALCOHOL

Must be for on-premise sampling and off-premise sales only. All beverage alcohol brought onto the licensed premise must be clearly labelled "for sale to the public only".

04

EXISTING PERMITS

You can not simply move your existing licensed space without permission from DLL. Contact the licensing staff if your event space needs to be adjusted.
In some cases, new permits may need to be issued.
